

SVS200ST (Short Throw)

The **AVRover SVS200ST** is a complete AV system designed primarily for the classroom.

The **ST** stands for Short Throw. The system can produce a 72" wide image (90" Diagonal) from 48" away. This keeps the system up closer to the front of the room while still allowing the teacher to walk back and forth between the image and the AVRover.

The **SVS200** is a portable, yet rugged AV system with all of its components securely mounted inside. The system, built in a sleek-looking powder-coated, scratch-resistant steel console, has excellent ventilation.

Using the **SVS200** is as easy as rolling it into place, plugging it into an electrical outlet, and turning it on. There are no doors to open, no shelves to deploy, and all controls are easily accessible. The **SVS200** is **always secure, even while in use.**

SPECIFICATIONS

CONSOLE

Steel: powder coated, scratch resistant
Dimensions: 36"H x 19"W x 24"D
Security Features: Security screws on all components and panels

Power Handling: 40 watts
Frequency Response: 90Hz-20kHz

OPTIONS

Various projectors
6" non-marking neoprene wheels
Rack mounted computer
Lockable drawers
TV Tuners
Wireless Mic System
ONfinity CM2 Max – Interactive wand system

The projector is securely mounted onto our **patented universal mount** that easily and quickly adjusts your image to the screen. A standard rack rail system allows the flexibility of adding additional components as needed.

Add the **ONfinity CM2 Max** interactive wand and receiver and you have the most portable, most powerful, interactive whiteboard system available. Use it anywhere, on any sized screen, wall or projection surface. Calibrate once and don't worry about losing calibration if the system is bumped. The calibration is with the image – not a whiteboard.

Consider the advantages of going portable:

- ✓ Highest return on investment, lowest presentation technology

**SoundVideo
SYSTEMS**

Sound Video Systems
75 Benbro Drive
Buffalo, New York 14225
