Based on end user requirements, the AVRover pictured here may look different and contain different components

Teach where you want, the way you want.

Bring the thrill of interactive learning to any surface

We've added infrared technology to the AVRover allowing any projected image to be completely interactive. Transform a wall, whiteboard, pull-down screen, or any flat surface into an interactive whiteboard.

Instruct your class wirelessly from your iPad or iPhone

Read eBooks as a class, highlight key passages, save compositions instantly, easily and wirelessly. The iAVRover lets you share the latest apps with your class, and frees you to walk around the classroom inspiring, engaging, and checking individual student's progress as you go.

Easy to use

No more calibrating when someone bumps into your whiteboard. With the Interactive AVRover, just move your system back into place and keep on teaching!

Key Features:

- Wireless iPad™/iPhone4S™ (or later) Mirroring
- 3000 Lumens Short Throw Projector
- Quick and easy 9 point calibration
- Unlimited number of whiteboard pages
- Support Windows/Linux/Mac OS X
